

# HIDDEN LIFELINE

Stephanie Ecks - M.Sc. Geography of Global Change, February 2021

## DEGRADED SOIL

## BUILDING SOIL

loss of soil structure  
erosion  
decreasing yields  
decline in soil organisms  
prone to heat (drought)

water infiltration / water holding capacity  
improved pore system  
resilience  
humus build-up  
biologically active soil

ENVIRONMENTAL, SOCIAL & ECONOMIC PROBLEMS

IMPROVED FOOD & INCOME RATES
